RF/MILITARY/AEROSPACE LINE LIST

High-Performance Antenna Systems for Military, Satcom and Commercial Applications. Products include Antennas, Feeds, Positioners and Rotators.

High-performance cables, RF (DC-70GHz), RF Connectors & Fiber Optic Solutions for consumer, commercial, space, defense & aviation.

Dielectric Laboratories (DLI) & Integrated Microwave Corp (IMC) solutions. High-Frequency Single Layer Capacitors (SLC), Build-to-Print Thin Film & other Microwave Components: Miniature Microstrip Filters, Ceramic Filters, Waveguide Filters, etc.

RF Solutions ranging from board level, connectorized components and IMA's to full subsystems in microwave & mmWave bands. Custom-built solutions leveraging capabilities and engineering from design-to spec to build-to-print applications utilizing both chip and wire and SMT technology with domestic manufacturing for the Mil-Aero, Space, & SATCOM markets.

RFMD's & TriQuint's semi-conductor and foundry technologies for RF solutions for mobile, infrastructure, defense and space applications.

Rugged high-speed optical transceiver modules and parallel embedded optics products for aerospace, defense, avionics, telecom, and data centers.

Highly secure keyless armored padlocks & keyless lock controllers, managed by a cloud-based platform with unlimited scalability, easy to deploy and use, purpose-built for critical infrastructure.

Relays, including Electromechanical, Solid-State, Space, Industrial, RF Microwave, and Coax Switches, & Switched Matrices.

Power & lightning protection for AC, DC, high speed data, signal, power protection cabinets, EMP | EMI filters, power conditioners, UPS and power distribution units.

High-efficiency power electronics, including DC and AC energy conversion systems. Ruggedized power supplies, rectifiers, inverters and distribution panels for mission-critical power applications.
